THRU: **MR. RYAN BLANCO**
Division DRRM Coordinator

Dear Dr. Reyes,

The University College London (UCL) and Xavier University (XU) continue to collaborate under the UNESCO Chair for Disaster Risk Reduction and Resilience Engineering (DRR & RE). We aim to create a research network and a shared knowledge, which promotes a shift in approach to school safety from individual building to local and regional school infrastructure, including the critical lifelines that make schools functional.

In October 2022, selected DepEd Schools, represented by their School Principals and School's DRRM Officers, participated in a face-to-face Seminar-Workshop titled: Educational Infrastructures' Resilience to Natural Hazards (Integrating Schools and Roads Systems). And we wish to thank you again for allowing them to join the said activity.

As a means of furthering the analysis on the workshop outputs, it is essential to visit some schools in the city under your division, to have better ground information and inquire on some items for clarification.

In line with this, we are respectfully asking your kind permission to visit the following school compounds (within March to April 2023) and converse with the persons-in-charge:

- (1) **City Central School**
- (2) **East City Central School**
- (3) **West City Central School**
- (4) **South City Central School**
- (5) **Kauswagan Central School**
- (6) **Lumbia Central School**
- (7) **Consolacion Elementary School**

We look forward to your positive response to this kind request.

Very respectfully yours,

Prof. Dina D'Ayala
