DIVISION MEMORANDUM

No. 222 s.2023

**ONLINE SURVEY ON THE DETERMINATION OF THE COMMUTING
CHARACTERISTICS BETWEEN HOME AND SCHOOL OF ELEMENTARY AND HIGH
SCHOOL STUDENTS**

TO:

All Public Schools District Supervisors
All Public Elementary and Secondary School Heads
This Division

1. In consonance with the letter request of Dr. Jose Regin F. Regidor (enclosed), you are hereby directed to facilitate the administration of an online survey across grade levels in elementary and high school students within May 2023 through this link: <https://bit.ly/CRTIPSurvey> or QR code
2. The online survey aims to: (1) determine the commuting characteristics of elementary and high school learners; and (2) formulate recommendations that will help improve road safety, particularly in the context of safer journeys for school children.
3. All school research coordinators shall help in facilitating the online survey. Participation in the survey is voluntary; however, learners are encouraged to participate in order to contribute in strengthening the road safety program and policies.
4. In adherence to Equal Opportunity Policy (EOP), inclusive and fair treatment are accorded to all participants regardless of age, gender and sexual orientation, disability, religion, and ethnicity.
5. Immediate compliance with this Memorandum is desired.

ROY ANGELO E. GAZO
Schools Division Superintendent

Subject: REQUEST FOR SURVEY DISSEMINATION TO SCHOOLS

Dear Mr. Gazo:

The Child Road Traffic Injury Prevention (CRTIP) Program of the United Nations Children's Fund (UNICEF) was conceptualized to make roads safer for children in the Philippines. One of the goals of this program is to strengthen the data collection and analysis which could serve as basis in the formulation of road safety policies and improvement of road infrastructure in consideration of children. In this regard, UNICEF and one of its partners, UP National Center for Transportation Studies (UPNCTS) through the UPNCTS Foundation, Inc., is planning to conduct a survey to be answered by elementary and high school students of Cagayan De Oro City to determine their commuting characteristics. With further analysis of the collected survey data, recommendations can be formulated that could help improve road safety particularly in the context of safer journeys for school children.

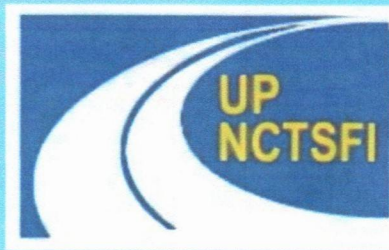

In this regard, we would like to request for your help in the dissemination of the survey to the schools targeted to be answered throughout the month of May 2023. We are targeting at least 20 random respondents per grade level for each school. Attached are posters for dissemination either as email attachment or printed and posted around the school premises. A QR code is provided on the posters for easy access of prospective respondents.

Thank you for your attention and hoping you can assist us in the conduct of the commuting surveys.

Very truly yours,

Jose Regín F. Regidor, Dr. Eng.
Assistant Project Lead

Determination of the Commuting Characteristics between Home and School of Elementary and High School Students

The Child Road Traffic Injury Prevention (CRTIP) Program of the United Nation's Children's Fund (UNICEF) was conceptualized to help improve road safety between home and school.

This survey was developed to determine the commuting characteristics of school children and formulate recommendations to improve road safety particularly in the vicinity of schools.
